

Hello there! If you're popping in here today
There are a few things that we need to say
No-one clears up at the end of each day
Please wash up, dry up *and* put away

1

Put tea bags or food waste in our compost tin
Don't put biodegradable stuff in our bin
Landfills are bursting right out of their skin
Recycle all rubbish: put more effort in

2

Please become more environmentally aware
Our planet has fallen into disrepair
The world's in your hands, give it more loving care
There's no Planet B and there is no elsewhere

3

Please don't think 'eco' is all doom and gloom
We must pull together, we cannot assume
A cleaner will do it, then push round a broom
It all starts by leaving it nice in this room
